Solution: [Ensure all media and link elements provide alternatives and adhere to WCAG standards.](#)

2.

Ensure the website reflects the identity and credibility of the Indian government.

 Compliant

3.

Headings, bullet points, and short paragraphs are used for readability.

 Compliant

4.

Maintain consistent branding elements (logos, colors, fonts) across all devices.

 Compliant

5.

The core content and functions are easily accessible on mobile devices.

 Compliant

6.

The text is concise and to the point.

 Compliant

7.

Use high-contrast colors to improve visibility, especially in bright outdoor conditions.

 Compliant

## Contact Us

1. A brief history of the organization is included, giving users context on the organization's origins and evolution. ✗ Not Compliant

Reason: No historical background offered.

Solution: Provide a brief history of the organization.

- Consistent branding and visual style are maintained on the
2. Contact Us page to reinforce brand identity and ensure a cohesive user experience across the site. ✓ Compliant

3. Contact details for inquiries related to the organization are included, providing a channel for users to reach out for more information or support. ✗ Not Compliant

4. Key team members are introduced with brief bios, personalizing the page and building trust by showing the individuals behind the organization. ✗ Not Compliant

5. Significant achievements and milestones are highlighted to demonstrate the organization's track record and success. ✗ Not Compliant

6. The Contact Us page includes information about key leaders and their roles. ✗ Not Compliant

7. The Contact Us page provides a detailed overview of the organization or entity, offering users background information about who is behind the site. ✗ Not Compliant

8. The core values of the organization are clearly outlined, providing insight into the principles that guide the organization's actions and decisions. ✗ Not Compliant

- |     |                                                                                                                                                                 |                 |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 9.  | The mission and vision of the organization are clearly stated, communicating the organization's goals and aspirations.                                          | ✗ Not Compliant |
| 10. | The organization's operations and goals are presented transparently, building trust by being open and honest about the organization's practices and objectives. | ✗ Not Compliant |
| 11. | The purpose of the Contact Us page is clearly defined, helping users understand the mission, vision, and values of the organization.                            | ✗ Not Compliant |

## Page Layout and Visual Design

- |    |                                                                                                                                                                           |                 |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 1. | Buttons and controls have labels or designs that clearly indicate their intended function to improve user interaction.                                                    | ✓ Compliant     |
| 2. | Clickable items, such as buttons, are clearly recognizable as interactive elements to enhance usability and reduce ambiguity.                                             | ✓ Compliant     |
| 3. | Hyperlinked texts are readily identifiable (e.g., underlined) without requiring the user to search for them to ensure they are easily found.                              | ✓ Compliant     |
| 4. | Icons and graphics are standard and intuitive (i.e., recognizable and commonly understood) to improve user comprehension.                                                 | ✓ Compliant     |
| 5. | Non-clickable items do not possess attributes that may indicate they are interactive to prevent user confusion and frustration.                                           | ✓ Compliant     |
| 6. | Standard elements such as page titles, site navigation, page navigation, privacy policy, etc., are easily accessible and recognizable to users for consistent navigation. | ✗ Not Compliant |

7. The same font style is used throughout the website or mobile application to maintain visual consistency. ✅ Compliant

## Responsiveness

- Use clear, intuitive menus and navigation bars, and consider
1. implementing navigation patterns like the hamburger menu for simplified navigation. ✅ Compliant

## Branding

1. Your app's branding is incorporated alongside Meri Pehchan's branding to build trust and credibility. Not Applicable

## Search

1. Ensure the search bar aligns with the overall theme and branding of the website ❌ Not Compliant
- 
2. Indicate if the search is global or local, with context-specific cues, like "Search within this list". ❌ Not Compliant
- 
3. Placeholder text in the search bar guides users on what they can search for, such as "Search products, categories, or brands". ❌ Not Compliant
- 
4. The placeholder text is kept clear and concise, avoiding jargon. ❌ Not Compliant
- 
5. The search bar is prominently placed, typically at the top of the screen, for easy access. ❌ Not Compliant

## Personalisation

1. Location-based services or content recommendations are offered to provide relevant information based on the user's geographic location. ✗ Not Compliant

## Task Orientation

- |    |                                                                                                      |                 |
|----|------------------------------------------------------------------------------------------------------|-----------------|
| 1. | Buttons are used for commands and actions instead of hyperlinked text to clarify functionality.      | ✓ Compliant     |
| 2. | Crucial call-to-action buttons are prominently displayed on all pages and screens to guide users.    | ✓ Compliant     |
| 3. | Important and frequently used features are positioned near the centre of the page for quick access.  | ✓ Compliant     |
| 4. | Scripts, applets, movies, audio files, graphics, and images are not overused to prevent distraction. | ✓ Compliant     |
| 5. | Sorting and filtering options are provided for pages with a lot of information to enhance usability. | ✗ Not Compliant |
| 6. | Users are prompted before automatically being logged off to avoid unintended interruptions.          | Not Applicable  |

## Navigation and Information Architecture

- |    |                                                                                                                                   |             |
|----|-----------------------------------------------------------------------------------------------------------------------------------|-------------|
| 1. | A consistent structure is applied to similar sections and features, helping users develop a mental model of the website's layout. | ✓ Compliant |
| 2. | Clear and descriptive labels are used for categories and sections to make navigation intuitive.                                   | ✓ Compliant |
| 3. | Navigation elements are large enough to be clicked easily and are accessible to users with disabilities.                          | ✓ Compliant |

- |    |                                                                                                                                       |             |
|----|---------------------------------------------------------------------------------------------------------------------------------------|-------------|
| 4. | Navigation elements are placed in prominent locations, such as at the bottom or top of the screen, where users can easily reach them. | ✓ Compliant |
| 5. | Primary actions and important content are highlighted on each screen, reducing the need for excessive navigation.                     | ✓ Compliant |
| 6. | Primary navigation elements (e.g., tabs, menu items) are easily accessible and clearly labeled.                                       | ✓ Compliant |
| 7. | Related content and features are grouped logically to help users understand where to find specific information.                       | ✓ Compliant |

### Lists, Filters, and Sorting

- |    |                                                                                                                          |                 |
|----|--------------------------------------------------------------------------------------------------------------------------|-----------------|
| 1. | All list items use consistent styling, including fonts, colours, and spacing, for a uniform look and feel.               | ✓ Compliant     |
| 2. | Filters are positioned in a prominent and easily accessible location, such as at the top of the list or in a fixed menu. | ✗ Not Compliant |
| 3. | List items are easily clickable with sufficient spacing, preventing accidental taps and improving touch accuracy.        | ✓ Compliant     |
| 4. | Visual separators or dividers are used between list items to enhance readability and distinguish between items.          | ✓ Compliant     |

### Forms and Data Entry Checklist

- |    |                                                                                                                      |             |
|----|----------------------------------------------------------------------------------------------------------------------|-------------|
| 1. | Forms are concise, including only essential fields relevant to the user task or data entry process.                  | ✓ Compliant |
| 2. | Labels are positioned prominently above or beside input fields, clearly indicating the type of information required. | ✓ Compliant |

- |    |                                                                                                                          |                |
|----|--------------------------------------------------------------------------------------------------------------------------|----------------|
| 3. | Longer forms are divided into logical steps or stages using steppers to guide users systematically through each section. | Not Applicable |
|----|--------------------------------------------------------------------------------------------------------------------------|----------------|

## Writing and Content Quality Checklist

- |    |                                                                                                                                     |                 |
|----|-------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 1. | A consistent brand voice is maintained across all content, reflecting the website's personality and values.                         | ✓ Compliant     |
| 2. | Accessible help sections or FAQs are included to address common user queries and support self-service information retrieval.        | ✗ Not Compliant |
| 3. | Content aligns with user needs and expectations, providing relevant information that adds value to their experience.                | ✓ Compliant     |
| 4. | Content is organized hierarchically with clear headings, subheadings, and bullet points to facilitate scanning and navigation.      | ✓ Compliant     |
| 5. | Content is reviewed for spelling errors, typos, and punctuation mistakes before publication to maintain quality standards.          | ✓ Compliant     |
| 6. | Content is tailored to the website's target audience, considering their language proficiency, cultural background, and preferences. | ✓ Compliant     |
| 7. | Dense blocks of text are avoided; content is broken into smaller paragraphs, and whitespace is utilized for readability.            | ✓ Compliant     |
| 8. | Grammatical correctness is ensured in all written content to enhance professionalism and credibility.                               | ✓ Compliant     |
| 9. | Important information is highlighted prominently, ensuring that critical details stand out for users.                               | ✓ Compliant     |

10.

Sentences and paragraphs are kept brief to maintain user engagement and facilitate quick comprehension.

✔ Compliant
11.

Simple and direct language is used to ensure that content is easy to understand, especially on smaller screens.

✔ Compliant
12.

The tone of voice is adjusted based on the context and purpose of the content (e.g., formal for legal notices, friendly for user interactions).

✔ Compliant

Help, Feedback, and Error Tolerance Checklist

1.

Options are provided for users to contact customer support directly via email, chat, or phone for more complex issues.

✘ Not Compliant
