

Import Purchase order

There is no change in this process. It will continue as it is.

Advance Payment against Purchase order

Based on offline payment request received from material department payment advise is generated at finance department by entering relevant PO number. This process will continue as it is.

Creation of ASN by Material Department

Material department create ASN by entering suppliers name, BL Number and link the related PO with ASN and enter proportionate advance adjusted in this ASN.

CAD Payment against Advance Shipment Notice

Based on offline payment request for CAD Payment from material department payment advise is generated at finance department by entering relevant ASN number and PO number. This process will continue as it is.

Shipping Line and other landing cost in Advance Shipment Notice (ASN)

Landed costs related to Shipping lines and other expense whose bills are received and are to be paid before clearance of goods are to be entered in Advance Shipment Notice instead of entry in warehouse receipt by material team. New option is created in ASN which generate payment advice automatically based on abovementioned costs recorded in ASN. Based on payment request from material finance will release payment using such payment advise.

Warehouse receipt

Landed costs created in ASN will automatically appear in warehouse receipt. Other landed costs whose bills are received but payment are not made are entered in warehouse receipt in the same manner.

Landed costs whose bill are not received like CHA bills may be entered after confirmation of the receipt.

Custom Duty Payment

A new option is underdevelopment for payment of custom duty in which a session is generated from warehouse receipt contains PO No., ASN No. and warehouse receipt No. and option is available for user to fill Bill of entry No. Bill of entry date and amount of Custom Duty. Payment advice is generated from this session. Payment advice is not generated twice against one warehouse receipt which ensure control on double payment of custom duty. After generation of payment advise custom duty payment request will be submitted to accounts and payment will be released by accounts.

NEW FUNCTIONALITY FOR CURRENCY DIFFERENCE IN IMPORT

Option is created in Warehouse receipt (MRN) for “Advance / CAD Payment Details”. On clicking this option a window opens containing details of Advance and CAD payments against Purchase order.

The screenshot displays the 'Warehouse Receipt' application window. The 'Specific' menu is open, showing the 'Advance / CAD Payment Detail....' option highlighted. The main window contains a 'Status' section with checkboxes for 'All Lines Final', 'Inspection Required', 'All Lines Complete', 'Partially Confirmed', 'Errors Logged', and 'Receipt Text'. Below this is a 'Receive (Easy Entry)' section with input fields for 'Name' and 'Number (Line)'. The bottom section features a table with columns: Line, Order L, Received Quantity in Receipt Unit, Final, Inspection, Confirmed, and Lot. The table shows a single entry for 'CAP TROMA' with a quantity of 14.7780 and lot number 'MEDU8741297'. The status bar at the bottom indicates 'Modify', 'whinh3512m000', '200', and 'PERSONALIZED'.

Line	Order L	Received Quantity in Receipt Unit	Final	Inspection	Confirmed	Lot
10	10PA01	14.7780				MEDU8741297
TOTALS:		1				

User (Material Deptt.) has to select the appropriate Advance payment and CAD. CAD and warehouse receipt both are linked with the ASN No. After selection, weighted average is shown on this session. After click the process option, currency rate mention on this session is updated in the session currency rates and the same rate is used to confirm the receipt and for financial transaction.

All Currency Rates Last tcmcs0108m000 200 Local

If effective currency rate in “Currency Rate Session” and “Advance / CAD Payment Detail Session” is not equal, the receipt will not be confirmed. So if the user forgets the processing the currency rates in warehouse receipt, it shows error while confirming.

Sales Prices of goods from Port to Other units

Now we are starting to use lot price for inventory valuation in CMR Corporate. So when goods are despatched from CMR Corporate to other units of CMR through warehousing order, Price of goods are automatically pick from the total cost of the container in CMR Corporate includes Price of goods, landed costs and expenses parts of the custom Duty.

In case of goods sold through Sales order, Price is calculated as doing in present scenario.

Matching of Costing in Finance

Finance will not required to change the currency rate while booking costing, hence no currency difference is generated as Payment and Purchase are booked at the same exchange rate.
